

Project Proposal For 40Kwp Solar Shed Mounted System

To:

M/s. HARVEST SPRING LEAF
PROGRESSIVE EDUCATIONAL SOCIETY
KHAMMAM, TELANGANA.

Date: 31/03/2026

Qt No: RKGME/TS/25-26/478

COMPANY INTRODUCTION:

RK GREEN MOUNT ENERGIES is renowned Organization based in Hyderabad, we are in Solar energy domain founded by enthusiastic technocrats pooled together from leading engineering Organizations. RGME for all kind of solar Design and Technical Services We always feel proud in demonstrating innovative technologies like floating Solar systems, Rooftop Solar projects Advanced Solar tracking systems, Solar Energy storage Battery solutions, Solar water heaters, solar street lights solar fencings and Water Heat pumps. RK GREEN MOUNT ENERGIES is providing the Trunkey solution for roof top solar photovoltaic power plants and its company Certified by **TGREDCO & MNRE**.

SUBJECT:

RK GREEN MOUNT ENERGIES Placing the quotation for installation of **40kwp** Solar on grid system at your place This proposal includes the Design, Supply, Installation and commissioning. It includes 5 years of comprehensive Maintenance.

BLOCK DIAGRAM OF SOLAR NET METERING CONCEPT:

Net metering works by allowing the grid to act as a giant battery for your solar power system. When the sun shines, the electricity produced will be used to power your home, and your electric meter will not spin. When you produce more than you use, the excess electricity will flow back to the grid, and your meter spins backwards. When you do not produce enough solar electricity for your home, your meter spins forward as it always has.

If you produce more electricity than you use in any given month, A credit for this electricity can be carried forward. This balance will be used to offset extra usage in future months. For most houses in New England, this means that extra solar electricity generated in the summer can be used to offset electricity usage in the winter. Solar will generate as much as three times more electricity during long summer days than during the short days of mid-winter.

SYSTEM SPECIFICATIONS FOR 40KWp:

S.NO	Material Description	Specifications	Make	Qty
1	SPV Modules	600WT Topcon, NDCR Bifacial Mono Perc Tier 1 Modules Dual Glass	RENEWSYS	67 NOS
2	Module Mounting Structure	Aluminum Profiles 300mm/400mm Length, With 100mm Height	REPUTED	As per site
3	Solar Grid Tie inverter	3 - phase High Efficiency	POLYCAB	40KW
4	DC Distribution Box	MS Enclosure with protection IEC 60189BIS	HAVELLS/L&T	1set
5	AC Distribution Box	3Ph- Distribution Box with Type 2 Surge protection Device. MCB & AC SPD	HAVELLS/ ELMEX	1set
6	MC4 Connectors	Male and Female Fair	ELMEX (TUV)	As per site
7	Cables	As per IS Standard Armored, FLEXIBLE DC – 1CORE 4SQR MM, Earthing – strip- 25x3mm	POLYCAB	As per site
8	Conduits/ Cable trays and its Accessories	UPVC	POLYCAB	1set
9	Earthing Kits	CPRI Tested Back Fill Chemical Compound type	EARTHPLUS	1set
10	Lighting Arrestor	As Per Site Design	SS304 & HDG	1set

NOTE: Solar Production Subject to Grid Availability Dust free cleaning of the panel Required regularly. SPV Panels has to Clean Every 2 to 3 weeks.

Pricing Details for 40kwp:

S.NO	Description	Rs/Kwp	PRICE
1	Project cost	32,139.58	12,85,583.2
2	GST 8.9% (5%, 18%) on project cost	2860.42	114,416.8
3	Project cost to client	35,000	1400,000/-

IN WORDS: FOURTEEN LAKS ONLY.

NOTE: The Above Price Is Including GST.

NOTE: 5% GST Applicable for 70% of the system cost and 18% GST Applicable for 30% of the system cost

System Proposals:

Module Mounting	The roof should have a load bearing capacity of at least 40 to 50 Kgs/ Sqr feet's Area required for 40kwp will be about 2400 Sqr feet's
On Grid tie Inverter Capacity	High efficiency inverters suitable for 40KWP Solar Power Plant
Power Generation	We will guarantee 72,000 KWH/year subject to grid availability and assuming 365 working days/ consuming days.
Project Life & Degradation	25 years & 1% Per Annum.

Return of Investment 40kwp:

S.NO	Description	Details
1	Proposed Solar Rooftop System Capacity	40KWP
2	Roof type	Shed mounted
3	Shadow Free Area Required on rooftop with clearance	3200SFT
4	Estimated Solar Power Generation/ Day	200UNITS
5	Estimated Solar Power Generation / Month	6000 UNITS
6	Estimated Solar Power Generation in 25 Years	1,599,686UNITS
7	Estimated Monthly Savings from Solar (Rs)	54000
8	Estimated Savings from Solar Plant in 25years (Rs)	14,397,176
9	Payback Period in Months	26

RETURN ON INVESTMENT

Description	Units	Value
Contracted Maximum demand (CMD)	KVA	40
Existing Unit Rate	INR	10
Proposed Solar System Capacity	KW	40
Shadow free Area required on rooftop with Clearance	Sq Mtr	564
	Sq feet	3,200
Estimated Solar Power Generation / Month	KWh	5,400
Total System Cost	INR	14,00,000
Monthly Savings from Solar Plant	INR	54,000
Return on Investment	Months	26
Estimated Solar Power Generation for 1st Year	KWh	64,800
Estimated Savings on Solar Plant from 1st Year	INR	6,48,000
Estimated Solar Power Generation for 1 to 5 Years	KWh	3,17,584
Estimated Savings on Solar Plant from 1 to 5 Years	INR	31,75,845
Estimated Solar Power Generation for 6 to 10 Years	KWh	3,02,020
Estimated Savings on Solar Plant from 6 to 10 Years	INR	30,20,197
Estimated Solar Power Generation for 11 to 25 Years	KWh	8,20,113
Estimated Savings on Solar Plant from 11 to 25 Years	INR	82,01,134
Estimated Solar Power Generation for 1 to 25 Years	KWh	14,39,718
Savings from Solar Plant in 25 Years	INR	1,43,97,176
Unit Rate for 25 Years with Solar Power Plant	INR	1.0

CO2 Emission Reduced(KWh) Per month	KG	3936
CO2 Emission Reduced in total 25 years	KG	11,80,800
Co2 Reduction Equivalent to planted no of trees per month	Tree	60
Total Trees for (1Month+1Year+25years)	Tree	18000
Note: Above mentioned values are approximately and subject to weather conditions & Periodical cleaning of Modules.		

YEAR WISE SAVINGS FROM SOLAR SYSTEM

S.no	Tenure	Annual Solar Power Generation	Monthly Solar Power Generation	Annual income from Solar Power Generation
1	Year-1	64,800	5,400	6,48,000
2	Year-2	64,152	5,346	6,41,520
3	Year-3	63,510	5,293	6,35,105
4	Year-4	62,875	5,240	6,28,754
5	Year-5	62,247	5,187	6,22,466
6	Year-6	61,624	5,135	6,16,242
7	Year-7	61,008	5,084	6,10,079
8	Year-8	60,398	5,033	6,03,978
9	Year-9	59,794	4,983	5,97,939
10	Year-10	59,196	4,933	5,91,959
11	Year-11	58,604	4,884	5,86,040
12	Year-12	58,018	4,835	5,80,179
13	Year-13	57,438	4,786	5,74,377
14	Year-14	56,863	4,739	5,68,634
15	Year-15	56,295	4,691	5,62,947
16	Year-16	55,732	4,644	5,57,318
17	Year-17	55,174	4,598	5,51,745
18	Year-18	54,623	4,552	5,46,227
19	Year-19	54,076	4,506	5,40,765
20	Year-20	53,536	4,461	5,35,357
21	Year-21	53,000	4,417	5,30,004
22	Year-22	52,470	4,373	5,24,704
23	Year-23	51,946	4,329	5,19,457
24	Year-24	51,426	4,286	5,14,262
25	Year-25	50,912	4,243	5,09,119
		14,39,718		1,43,97,176

WARRANTY:

- 8 Years on Inverter.
- 30 years On Solar PV Modules Power Performance And 12 Years Solar Power Generation Guarantee.
- 5 Years on AMC.

PAYMENT TERMS:

1. **Payment Terms:** 20% Advance with Purchase Order, 60% Before material Delivery, 10% after installation and 10% after Commissioning.
2. **Delivery:** Within one Week from the Date of PO, Installation & Commissioning: Within in one week After Material Dispatch.

TERMS AND CONDITIONS:

1. Above Price is Including Applicable Taxes, Transportation, DISCOM Feasibility Charges, etc.
2. LT Panel and additional connection points with the LT Panel are in Customer scope of duty
3. This Price valid Up to 1 Month from the Date of Quotation.
